

# New Structural Closer from

- No need for long window straps, excellent screw retention for direct window fixing capabilities.
- New super insulating structural foam technology enables loading of heavy A rated windows directly over cavity.
- Developed for “Fabrication First” design principles.

## Direct load, direct fix

- Reinforced with steel for inner and outer leaf support
- Forms a template to facilitate square and accurate opening for brick laying

## Cill Support Brackets

- Ideal for **Passive House Design** and CSH requirements for wider Sized cavities up to 300mm.
- Reduce air leakage with the option of a four sided closer at the head.
